

SUPPORT LOCAL CITIZEN INITIATIVES with Be Planet

SUPPORT LOCAL, INNOVATIVE AND SUSTAINABLE PROJECTS

Today, faced with the need to take care of our planet, citizen initiatives are multiplying in our country. To encourage and make these varied initiatives possible, the Be Planet Foundation raises funds from those who want to contribute directly and positively to the transformation of our society. Thus we support these local, innovative and sustainable projects that have a positive and concrete impact on the environment.

ACT GLOCAL

BY MAKING A CONTRIBUTION ON TOP OF YOUR CO2 OFFSET

Be Planet supports a variety of projects that have a positive impact on the environment, all led by associations and citizens. These projects, selected by a jury, must meet a series of criteria, the most important of which is the environmental impact of the project. The socio-economic impacts and the mode of governance of the projects are also taken into account in the selection. The sustainability, innovation and exemplary nature of the projects are also analysed.

ABOUT BE PLANET

is a foundation established in 2015 on the initiative of federations of environmental associations and personalities from different backgrounds. They support and guide local citizen initiatives around mobility, biodiversity, food, etc.

Be Planet (www.bepplanet.org) considers companies as part of the solution and associates them with citizen projects by offering a "win-win" partnership and an opportunity to share experiences and knowledge to build a bridge between two worlds with us, the citizens, in between.
